Preface

The aim of this paper is to prove that Japanese surface sentences realize the universal deep structure based on the four-dimensional cognition.

When any language is as an expression of cognition, any sentence must be based on the following structure of four-dimensional cognition.

This work intends to make a suggestion for the UNIVERSAL SENTENCE STRUCTURE, whose theoretical value was clarified in Noam Chomsky (1957: 11), called "semantic absolutes, known in advance of grammar" in Chomsky (1957:101, NB 9) and DEEP STRUCTURE OF SENTENCES in Chomsky (1965) but not shown in Chomsky yet.

The universality of language in Chomsky, Joseph Greenberg (1961) and so called Port-Royal Grammar in 1660) by A. Lancelot and C. Arnauld is "commonality" or "statistical tendency" of the phenomena, which cannot help but to accept exceptions.

In the 14th century Thomas of Erfurt tried to link sentence forms to its contents or Aristotle’s Categories. The same trial was repeated by Émile Benveniste (1966) thinking appropriately that the form of sentences should be restricted by the cognition while language is essentially to express cognition. Chomsky, also having penetrated the nature of language, was enough aware of these failures to apply himself to the formal analysis separated from the meaning.

Criticizing Aristotle’s Categories induced from sentences, Immanuel Kant (1781) integrated them into space and time, which correspond to absolute space and absolute time in Isaac Newton (1687). The relativity of space and time was proposed by G. W. F. Hegel (1770-1831), whose concept of space and time corresponds to Albert Einstein’s theory of relativity.

Therefore, we should link the structure of sentences to Einstein relative four-dimensional cognition developed from Aristotle’s categories to recover the failure of Thomas of Erfurt, Benveniste and Chomsky, those who had penetrated that the nature of language is to express cognition.

The sentence structure deduced from the relative four-dimensional structure of congestion may be what Chomsky called "semantic absolutes, known in advance of grammar" (Chomsky (1957:101, NB 9)) or "Deep Structure of Sentences"(Chomsky (1965)) or Universal Sentence Structure.

This work shows various syntax tree diagrams to verify the universal sentence structure as based on four-dimensional cognition in Japanese surface structure.
I. Universal Sentence Structure

1. Cognition of Space-Time and Sentence Structure

We perceive things and recognize them with their names, which classify and place them in our cognitive or linguistic world. Therefore, language or sentences should be limited by the cognition, which consists of four dimensions according to Einstein.

A thing exists in four-dimensional: three-dimensional space and one-dimensional time.

If time forms a line, it has two extremes; the beginning and end. As time goes by, things change. In this meaning time is a synonym of 'change'.

The two things at both ends of time or change are axial parties in the structure of the four dimensions. When there are parties concerned, there must be a third party, in distinction from which the parties concerned stand out. As a matter of course a change causes interests, both advantageous and disadvantageous, which always arise in the third party.

2. Transitive and Intransitive Verbs

Transitive verbs link a subject and a direct object no identical with the subject and intransitive verbs link a subject and a direct object identical with the subject, which may be expressed by reflexive direct objects. Direct objects of intransitive verbs tend to be latent because of the identity with subjects. We can recognize as intransitive verbs reflexive verbs whose direct object is identical with the subject.

4. Modifiers

If a thing is composed of quality and quantity and situated in space-time, all the attributes of a thing should belong to the quality, quantity or location in space and time.

Adjectival Modifiers (order not specified)

- (Qualifier Adjective) what (kind of)
- (Quantifier Adjective) how much/many
- (Temporal Adjective) of when
- (Spatial Adjective) of where
As a change is realized in a thing, the same can be seen in the attributes of a change or time, which are also to be ascribed to quality, quantity, and spatial and temporal location. Consequently, all the modifiers of both nouns and verbs attribute to the four elements.

On account of the paucity of lexical meaning in the verb "be" it requires a complement(C) as an adverbial modifier to express a static existence, which may be a noun or adjective or adverb regardless of the parts of speech.

Adverbial Modifiers (order not specified)

<table>
<thead>
<tr>
<th>Verb</th>
<th>C what/who/how/when/where/how much/many</th>
</tr>
</thead>
<tbody>

<td></td>
<td>(Quantifier Adverb) how much</td>
</tr>
<tr>
<td></td>
<td>(Temporal Adverb) when</td>
</tr>
<tr>
<td></td>
<td>(Spatial Adverb) where</td>
</tr>
</tbody>
</table>

In many cases static verbs or verbs of the same kind do not make sense without predicative complements.

The C in intransitive verbs seems to express the attribute of S and the C in transitive verbs, the attribute of O. However, when the change, including no change, ends in O, the attribute expressed by C is not of S but O both in intransitive and transitive verbs.

Adjectives are modified by various kinds of words. As almost all of these words have the same forms as adverbs, they have been regarded as adverbs. However, we had better call them AD-ADJECTIVES because they do not modify verbs but adjectives.

In the same way adverbs may be modified by AD-ADVERBS.

4. Delimiter Particles

Delimiter particles limit the range or extent added to any word and they may be called also 'Additional Particles'. However, subjects and direct objects lose their respective markers ‘ga’ and ‘o’ with their apparition, then, their distinction depends on the context.

III. Frequency of Components

In the 1,563 examples the sentences with direct objects or transitives are about 22% (Figure 1). On the other hand, the sentences with complements, which are exclusively intransitive in Japanese, are 30% and the sentences without direct objects nor complements are 48%. In some of them the direct objects may be omitted, but the majority is more likely to be intransitive. Consequently, we find more intransitive sentences than the transitives in Japanese.

The most important component in Japanese sentences is the verject (43%), the second, the subject (30%), the third, the complement (14%), the fourth, the direct object (10%) and the least, the indirect object (1%) as we see in the Figure.
2. We can see the same tendency also in the Figure 3-7.

The Figure 8 shows that about three quarters of modifiers are adverbs and only one quarter is adjectives in Japanese. In both adverbs and adjectives the majority is the qualifiers, which are various and complicated.
IV. Syntax Tree Diagram

Conditions:
1. Vocatives, exclamatives and sentence conjunctions are excluded, as they are not components of a sentence.
2. Subordinate clauses are not analyzed.
3. ‘da (<dearu)’ and ‘desu (<dearimasu)’ are variations of the verb ‘aru’ (be).
4. Combinations of verbs and auxiliary verbs are regarded as verjects.

1. **SV 30.9%**

The most frequent sentences in Japanese are SV sentences.

1) With modifiers

SV sentences tend to be modified because of their simplicity.

(1) 今野は、購買所の前にある、青電話ボックスに入った。HK (See the end for abbreviations.)
Konno entered in the blue telephone box in front of the store.

When I drew near, a big two-story house of synthetic building material on a shabby thatched roof was relieved in the depth out of keeping with the color of the trees grown thick in deep black on the hill behind the house.

2) Passive Sentences

The passive forms are not made up of the verb “be” with a past participle complement but with an auxiliary verb such as “rare”, “sare” in Japanese.

(9) The Hikoyama River was stemed slightly upstream of the bridge with two semicircular arches.

(10) The atmosphere consists of 80% of nitrogen and 20% of oxygen.

5. CV : 11.3%

SCV sentences without subjects (: 173 examples) are a little less than those with subjects (: 191 examples). In a copulative sentence, which means S=C, the complement is hardly omitted because it is a new information. On the other hand, the subject is needless because it is almost always old information.

1) Identical Subjects with Complements

When the complement expresses the subject, it is omitted.
なんとも後味の悪い事件でした。 TS

The case left a bad taste in the mouth.

ばかな忠告だな。 KN

The advice is stupid.

Mさんの別荘番で越後から来ていた女であった。 YH

The woman was the caretaker of the Emu’s country house from Echigo.

2) Hidden Subjects behind Topics

There are sentences in which the topic substitutes the absent subject, such as ‘Boku-wa (chuumoNsuruno-ga) unagi da (As for me, (the order) is an eel)’, which is formally equal to ‘Boku-wa unagi da (I am an eel)’.

Nam is in the office. GM

ナムさんは事務所です。
私は、そこまで読んで、息もたえだえの思いであった。

I felt my feeble breath, having read that far.

Grown up in Ami-speaking households, Paorippu was talking exclusively in Japanese after entering a four-year elementary school.

弟がこの町を出たときはまだ小さかった。

When my younger brother left this town, he was still small.

3) ‘Time’ and ‘weather’ Subjects

When the subject is ‘the time’ or ‘the weather’, it is not expressed as we know it with complements, or the empty ‘it’ subject is not found in Japanese.
(119) 浅黄色の美しい夜明けだ。 SS
It is beautiful light yellow dawn.

(120) 十四日は、朝から雨だった。 HK
It was raining from morning on 14th.

(121) 前から我孫子の雪が見たいと云っていたK君が泊りに来ている時で丁度よかった。 YH

The fact is that I just came here to perform assigned proper duties.

(124) 人間、きまったことをやればいいんだ。 KN

All we have to do is perform a routine.

5) ‘The important thing’ Subjects

When the subject is ‘the important thing’, it tends to be omitted, because we can know the importance only with complements. In (127), we see two subjects ‘Ozatoshi-ga’ and ‘ki-ga’ in the subordinate clause, but ‘Ozatoshi-ga’ must not be the subject but the topic; ‘Ozatoshi-wa’.

(125) 遊びたい時も我慢して、あんなに練習しただから、きっといい結果が出るに決っていると信じることだ。 HG

Believe that it surely works because we have exercised so much even when we wanted to have fun.

8. SIV: 2.9%

We find here the indirect object in the eighth frequency. However, SIV sentences (44 examples) are about a quarter of SOV sentences (182 examples).

1) Potential Sentences

The potential SV sentences with indirect objects; ‘(be possible) for me’ takes the form of SIV, whose 11/16 examples are ISV sentences emphasizing indirect objects with delimiter particles.

(162) 私にはそれを直感することができるので。SO

Tetsun, do you think it goes well?
純が Jun-ga (Jun)
鉄三に Tetsuzou-ni (Tetsuzo)
たずねてやった。 tazuneteyatta (asked)

3) Existence
The Japanese intransitive SIV sentences express the existence of persons or things expressed in English transitive sentence ‘I have ~’, such as ‘I have a brother/fever/job/dream etc.’ The agent in English transitive is the indirect object in Japanese.

(168) 指名手配写真の人相をすぐにおぼえる特技があるんですよ。わたしには KK
I have a special ability to learn immediately the looks of a wanted criminal in the photograph)

指名手配写真の 人相を すぐに おぼえる shimeitehaishashiN-no niNsou-o oboeru (to learn immediately the looks of the photograph of a wanted criminal)
特技が tokugi-ga (special ability)
あるんですよ。 aruNdesu (polite colloquial)-yo (emphatic final particle) (is)
わたしには watashi-ni-wa (in me)

To Tamaki, I promote liberalization with the Ikeuchi Minister of International Trade and Industry, and there is the past record which cut one of the sources of funds of Sudo.

Emphasis on the Third Person

The intransitive SV sentences make SIV sentences to emphasize the third person interested in the change.

会社の利益にこそなりませんけれども、国民の皆さん方にはさらなる負担がふえる。 KI

The company makes a profit, but the burden on people increases further.
女はまじまじと、こちらを見つめている気配で、その目が、男には皮膚を刺すように感じられた。

Since 27,000 people were killed in action among them, it looked strange to me; who was a young boy, the figure coming back in a white wooden box held by a fellow soldier through the highway of Taipei.

9. C : 1.8%

Some sentences consist of only a complement, which gives new and the most important information in the SCV sentences depending on the context.

1) Noun Complements

15/27 examples of C sentences are made of noun complements. Some complements are only nouns, and others, with the delimiter or final particles.
The man is rather small.

The Kurebayashis is only an old couple.

The representative was a journalist, though he went into politics after the war, he often lost, but he came back while running a used-clothing shop and ‘Oden shop’; a small pub.

2) Adjective Complements

In the C sentences with adjective complements the adjectives are rather alternative such as good or bad than gradual such as height, length etc.
なるほど珍らしいに相違ない。KS
My visit must be rare indeed.

そんなに白ばくれなくてもいゝよ。SS
You don’t need to play so innocent.

どこかにまぎれこんでも、紐がついているからさがしやすい。HK

3) Adverb Complements
We found two adverb complements in C sentences only with interrogative final particle ‘kai’.

そうかい。KN
Is that so?
(181) Is the work also until 6:00 p.m. even these days?

\[
\text{この頃でもやはり午後六時までかい。} \quad \text{KS}
\]

4) Interrogative Sentences

Besides the above two adverb complements with interrogative particles; 6/27 examples have interrogative particles in C sentences, in which the complements import more than subjects or verjects.

(182) Is Huruhata a robot of Ikeuchi?

\[
\text{古畑は池内のロボットということか。} \quad \text{KN}
\]

(183) I’m not sure without checking it back to the police station, but the time since death may be ten hours more or less.

\[
\text{帰ってよく見なければ分らんが、まず十時間内外かな。} \quad \text{TS}
\]
May I subscribe to the newspaper?

新聞もとっていいかしら？

1. SIOV: 1.0%

The full sentences SIOV are only 1.0%. Languages in which the word order indicates the grammatical role; English, Chinese, Malay, etc., the components are hardly omitted to keep the order. On the other hand, the agglutinative languages, like Japanese, permit the omission of components because of the grammatical particles.

1) Transference of Concrete Things

Visible things or persons are needless to say, so we find here only two examples.

(185) 仁科は、タバコを老人に渡した。KK
Nishina gave a cigarette to the old man.

(186) 私は甘いものの好きな与一の為に、五銭のキャラメルと、バナナの房を新聞に包んで持たせてやった。SS
I gave Yoich, who likes sweets, a box of candies of 5 sens and a bunch of bananas wrapped in a newspaper.
2) Coherence of Verbs and Direct Objects

The coherent combination of a verb and a direct object such as ‘koe-o kaketa (poured voice=called out to someone)’, ‘te-o hutta (waved a hand)’, which works like a verb, makes the SIOV sentence with the interested third person or indirect object.

(187) ジープに乗った少尉は、遠まきに見ている人びとに、手を振った。 HK

The second lieutenant in a jeep waved a hand to people who were looking at a distance in a wide circle around him.

┌─(Aj-Ql) ジープに 乗った jīpu-ni notta (in a jeep)
 │  S 少尉は、shōi-wa (the second lieutenant)
 │  └─(Aj-Ql) 遠まきに 見ている toomaki-ni miteiru (who were looking at a distance in a wide circle around him)
  ├  I 人びとに、hitobito-ni (to the people)
  └  V 手を te-o (a hand)
       振った。hutta (waved)

  │  S ぼくは boku-wa (I)
  │  I 弟に otouto-ni (to my younger brother)
  │  └─(Av-Qt) また mata (again)
  └─  O 声を koe-o (voice)
       かけた。kaketa (poured)

3) Clarification of the Logic

The following SIOV sentences clarify the logic with full components, no matter how redundant the sentence may be.
(190) 小谷先生はカエルのえさをどこでどうして手に入れたのか、子どもたちにたずねてみた。UMI
Ms. Kotani asked the children where and how they got the bait of the frog.

(191) 09年、日高教は15年ぶりに定時制高校生3777人に生活実態調査をした。FT

(192) 座敷でピアノの音がして、K子さんが東京から来たお弟子に歌を教えていた。YH
I heard a sound of the piano in a room, and Keiko was teaching a song to the pupil from Tokyo.

11. IV: 0.9%

The most frequent word order in SIV sentences is the ISV, in which the indirect object is prior to all other components the same as in IV sentences. Therefore, we may say that many of the IV sentences are elliptic forms of ISV.

1) Potential and Spontaneous Sentences
SV potential sentences focus 'what' is possible; on the other hand, IV potential sentences give emphasis to 'for whom' it is possible.
(193) おれにはわからない。 KK
I don’t know what happens.

I おれには ore-ni-wa (to me)
S 事情が (jijou-ga) (what happens)
V わからない wakaranai (are unknown)

(194) 肌合いが似ていようと、ちがおうと、風越には、どうでもよいことに思えた。 KN

(Av-QI) 髪を 長く のばしていたし、kami-o nagaku nobashiteitashi sebironekutaitoiu kichiNtoshita kakkou-kara
(with long hair and in the clothes far from the appropriate appearance in a suit and tie)
I 小谷先生には KotaniseNsei-ni-wa (to Ms. Kotani)
S (その 先生が) (sono seNsei-ga) (the teacher)
V ちょっと chotto (slightly)
V だらしなく darashinaku (slovenly)
V 見えた mieta (looked)

2) ‘Au (see)’
In ‘dareka-ni au (to see someone)’ the direct object in English is an indirect object in Japanese. And it is synonymous with ‘dareka-to au (to see with someone)’, in which the direct object in English is an adverb phrase. Namely, the intransitive verb ‘au’ does not intend to bother another person.
(196) ちょっと人に会わなければならない。 KY
I have to see someone for a while.

(197) もうすぐ、てつぞうちゃんにあえますね。 UM
Soon we can see Tetsuzo.

3) Causative and Passive Sentences
In addition to potential and spontaneous, causative and passive, all these are expressed in auxiliaries in Japanese, are found in IV sentences. In (198) and (199) the subjects are context-dependent.

(198) ひまがあれば、局長たちに進講させた。 KN
When Furuhata had time, he made bureau chiefs give a lecture.

(199) 授業と重ならない午前から午後の早い時間帯の仕事を探したが、「夕方に入ってくれないと」などと、80社以上に断られた。 FT

(202) 須校にはないしょにしてや。 UM

Please keep it secret to the staff of the school.

12. Only Modifiers: 0.8%

When the context is eloquent, it is enough to say just a modifier expressing new information.

1) Adjectives

We cannot find more than one following example of adjective.
2) Adverbs

One adverb sentence is quite frequent in daily conversation.

(204) 「ぜんぜん」 SM

“I don’t remember at all.”

(205) 「じゃ、お先に」 KY

“Then, I will eat before you.”

3) Adverb Clauses

Being modifier, adverb clauses have rich contents equivalent to sentences. So that, it is quite natural that 8/13 examples of only modifiers are adverb clauses. In SOV languages like Japanese a sentence may be embedded by adding verbs till the last main verb, which subordinates the preceding sentence objectively.

(206) Sousuke Nishina was written to be simply reticent in his character in the article of the morning paper.

S (仁科草介は) (NishinaSousuke-wa) (Sousuke Nishina)
  (Av-QI) 性格は 寡黙の 一語に 尽きる、と。
  seikaku-wa kamoku-no ichigo-ni tsukiru, to
  (to be simply reticent in his character)
  (Av-P) (朝刊の 記事に) (choukaN-no kiji-ni) (in the article of the morning paper)
  V (書かれていた) (kakareteita) (was written)

Though willing to come, I couldn’t come because I was just busy.

(208) 実は、あるひとに、秘書官は無定量・無際限に働け、と忠告されたんですが、どうも、これまでの調子では、とても、そんな風に働いているとは思えませんので。 KN

In fact, someone advised me that a secretary should work with no stint, but because I don’t see them working so hard, I said so.

13. S: 1.0%

The 11 examples are the sentences composed only of the subject, which are much less than the 181 examples composed only of the verb. It seems because the whole contents of a sentence is shown less in the first subject than the last verb.

1) With Particles

All the 5 examples consist of the subject with particle are in the conversation to make clear its role in the context.

(209) 遺書は？ TS

The white silk pants, the floral pattern Vietnamese dress slit to the waist, the twinkling eyes with melancholy inclined the thin neck on the stand-up collar (were reminded).

1. IOV: 0.6%

We have 10 examples of the full components with latent subject; (S) IOV. It is rare to have indirect objects, whose frequency is 1% (Figure 7), loosing subjects, whose frequency is 64% (Figure 4).

1) Coherence of Verbs and Direct Objects
In 5/10 examples we recognize the coherence between verbs and direct objects.

(215) 顔中で笑って功たちに手をふっているではないか。 UM
Koji is waving his hand to Isao and his friends grinning from ear to ear.

(216) 玄関を出るとき、女に目礼をした。 KK
When he left the entrance hall, (the man) gave a nod to the woman.

(217) まず、総理にお尋ねをいたします。 KI
First, I would like to ask the Prime Minister a question.

2) Clarification of the Logic
In the other 5/10 examples direct objects have more information than the former coherent type.

(218) ウェートレスにコーヒーを注文した。 GM
I ordered a coffee to the waitress.
You ask to the station office what this train number 7 means.

あなたが駅にきいてみろ。 TS

あなたが駅にきいてみろ。

Seeming to be a present in advance (the second lieutenant) dealt one chewing gum to each man as carrier who were waiting in Hikoyama village.

The full form of SCV type with the indirect object counts only 7 examples. The full forms are hardly used both in the transitive sentences and in the intransitives.

1) Noun Complements

4/7 examples of this type contains noun complements including adjective noun complements. The most frequent was I-initiative type; ISOV, the same as in SIV sentences. We see that the indirect object appears when it is emphasized.
(221) 人間には気圧が必要なのだ。 UK
A human being needs atmospheric pressure.

(222) あの男にはそれくらいの芸当は朝飯前なのだ。 KK
A performance like that is a piece of pie for that man.

(223) 小谷先生は夏休みを遊びくらしたせいか、なかなか子どもたちに寛大だ。 UM
Ms.Kotani is quite generous to the children, probably because she enjoyed summer vacation.

2) Adjective Complements ‘nai (absent)’
In the 3/7 examples of SICV sentences the complements are the adjective ‘nai (absent)’.
The omission of the indirect object marker ‘–ni’ at the head of the sentence such as in (226) was found also in (169-70).

(224) 仁科にはその方面の知識はなかった。 KK
Nishina did not have the knowledge of the area.
誰もそんなものを求めていないにせよ、私にはそれ以外に与えることのできるものは何もないので。

Even if no one wants such a thing, I have nothing that I can give other than that.

俺たち大部屋なんて、アップで撮ってもらえるなんてことほかにはないですもんね。

We, the utility actors, have no other chance to be photographed by a close-up.

As the expressions ‘hugougakuni naru (is rejected)’ and ‘tameiki-o tsuku (let escape sigh)’ are idioms, the verbs ‘natta (was)’ in (227) and ‘tsuku (let escape)’ in (228) are needless to say.

Grammatically, the direct object ‘full-time high school’ in (227), which is an intransitive sentence, should be the adverb of place; ‘in the entrance examination of the full-time high school’.

16. Others: 0.4%

1) SO ：(2 examples)
神奈川県在住のケンさん(15)は、この春受験した公立の全日制高校を前期、後期とも不合格に。FT

Ken (15), a resident in Kanagawa Prefecture, (was) rejected from the public full-time high school to which he applied this spring both in the first and the second (examination).

マクベスであったか、ほかの芝居であったか、しらべてみれば、すぐ判るが、いまは、もの憂く、とにかくシェクスピア劇のひとつであることは間違いない、とだけ言って置いて、その芝居の人殺しのシーン、寝室でひそかにしめ殺して、ヒロオも、われも、瞬時、ほっと重くるしい溜息。

Though we can find it easily when we check if it was Macbeth or other play, just saying that it must be one of Shakespeare’s plays being languid now, in a scene of the murder in the play strangled secretly in a bedroom both the hero and I (let escape) a heavy sigh with relief for a moment.
2) ICV: (2 examples)

This type also begins with an indirect object.

(229) 心理学者にも似合しからぬ事だ。 KS
   It does not become a psychologist (that Tsuda thinks that the mind can act freely regardless of outside stimulation).

(230) 三人の警察官には、タバコ一箱ずつだった。 HK
   To the three policemen he dealt a box of cigarettes each.

3) SIC: (1 example)

The indirect objects also initiate this type.

(231) あんたに妙案はないかね。 KK
   Don’t you have any bright idea?
4) IC : (1 example)

(232) 彼らの求めているのは祖父とあなたで、私は関係ないもの。 SO
Whom they want is my grandfather and you, and I have nothing to do with the affair.

5) SIO : (0 examples)

The full form SIOV except V: SIO cannot be found in the examples. We suppose for example the following sentence.

(234) 父が私に手紙を。
Did my father write me a letter?

6) SI : (0 examples)

SI sentences such as (235) are not found in the examples.
(235) 私が山田さんに？
Did I said to Yamamda?

├ S 私 watashi-ga (I)
│ I 山田さんに？ Yamadasa-ni ? (to Yamad?)
└ V (言ったですって) ittadesutte(polite colloquial) (said)

7) IO：(0 examples)

The IO sentences are not in the examples. It would be difficult to find this type but, slogans.

(236) 人に愛を。
Give love to a person.

├ I 人に hito-ni
│ O 愛を。 ai-o
└ V (与えよ) ataeyo)

8) O ：(0 examples)

We have seen the sentences composed only of S and V, but there was not a sentence composed only of O such as (237).

(237) もっと光を。
More light.

├ O 光を。 hikari-o (light)
│ V (・・・)

9) I ：(0 examples)

The sentence composed only of I like (238) was not found in the examples. It is quite natural that the least frequent component makes alone a sentence.

(238) まず、子供たちに。
Please give first, to the children.

├ I 子供たちに。 kodomotachi-ni (to children)
│ V (あげてください) agetekudasai)(polite colloquial, imperative) (give)
Conclusion

The intention of this argument is to give theoretical proof for sentence structures in succession to Thomas of Erfurt (1350), who tried to explain the parts of speech in relation to the reality based on Aristotle’s categories. But Erfurt’s insightful trial did not end successfully because Aristotle’s categories are ‘imperfect’ in Kant’s word. We find a similar trail based on Aristotle’s categories in Émile Benveniste (1966), who went the way of Erfurt for the same reason. The argument of these discourses leads to Herder (1772)’s view that language is an expression of cognition in nature before a tool of communication.

Later, Aristotle’s enumerative categories are summarized in space and time by Kant, and Hegel made explicit the correlation of space and time. Nowadays we have Einstein’s four-dimensional cognition, which supports this argument (for further discussion, see Sakai (2008)).

When the nature of language is to express cognition, every single sentence should be provided with the structure of four-dimensional cognition, which may be the universal sentence structure. The components SIOV are not original but we have used them appropriately to describe every language.

The surface structure, in terms of Chomsky, of a sentence varies as we omit the understood parts for many reasons, which are shown in this paper. However, as far as we have seen in these 1,536 examples, we may say that the deep structure of a sentence is based on the four-dimensional cognition.

How it is defines what it is and what it is provides how it is. In other words, the phenomena define the essence and the essence provides the phenomena. Therefore, we could conclude that the essential definition of language is as an expression of cognition.
